Superior Roof Product for a Significantly Lower Cost.

Stop replacing your roofs.

- Typically 35% - 45% less cost than a tear off and re-roof.
- Twenty year factory warranty and 12 year maintenance warranty.
- Lower HVAC operating costs as well as lower temperature on the roof and in the building.
- Permanent encapsulation of the existing roof and anything underneath: No Tear-Off means: no risky exposure to floors below or exposure to extra costs related to clean ups, asbestos, and insulation replacement costs.
- Flashing and step flashing also remain and are coated.
- Total cost is tax deductible in the year it is installed.
- Marine based waterproof ECRS is a far better technology than rubber(EPDM), BUR, Tar, or asphalt and needs to only be re-coated every 20 years.
- Roofs are seamless; ice and then water will not separate and penetrate.
- Non toxic; no tear off, so no landfill disposal costs – Sustainable Design.
- Low VOC application and a listed Federal Government Energy Star Partner.
